The value of each of the properties has been assessed in accordance with the relevant parts of RICS Valuation – Global Standards 2020. Valuations were reported on the basis of Fair Value IFRS and our opinion of the Fair Value of each of the properties has been primarily derived using comparable recent market transactions on arm's length terms.

In particular, we have assessed the Fair Value IFRS of the properties in accordance with VPS4 Item 7 of the RICS Red Book. Under these provisions, the term "Fair Value" means "The price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants at the measurement date".

Our opinion is based on an analysis of recent market transactions where possible, supported by market knowledge derived from our agency experience.

Investment properties in use have been valued using a Discounted Cashflow. Income from each tenant is assumed to run for the duration of their lease term or up to first break option if deemed appropriate. Thereafter income is assumed to continue in perpetuity at our opinion of rental value. Explicit adjustments have been made for letting voids, empty service charge, letting fees, fit out contributions and irrecoverable operating costs.

A full explanation of the Assumptions made in our valuations and details of the sources of information are contained within our Reports.

The Company has provided us with the floor areas of the properties that are relevant to our valuations. As instructed, we have relied on these areas and have not checked them on site. We have made an Assumption that the floor areas supplied to us have been calculated in accordance with the local measurement practices, relevant at the date of valuation. The properties were inspected internally and externally from the ground level only in 2021. We only inspected representative areas of the building buildings. Plant rooms and roofs were not inspected.

We have relied on tenancy information provided by the Company but we have not read lease agreements. We have made an Assumption that the copies of all relevant documents sent to us are complete and up to date.

Certain properties were subject to works of repair, refurbishment or construction as at 30 June 2021 and in these cases the Company has advised us of the amount of the outstanding costs, which have been incorporated into our valuations.

We have not made any adjustment to reflect any liability to taxation that may arise on disposal, nor for any costs associated with disposal incurred by the owner. No allowance has been made to reflect any liability to repay any government or other grants, taxation allowance or lottery funding that may arise on disposal.

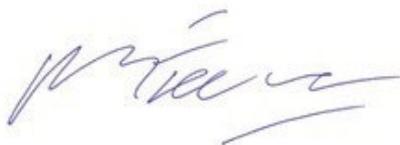

Having regard to the foregoing, we are of the opinion that the aggregate of the Fair Values, as at 30 June 2021, of the freehold and leasehold property interests owned by the Company valued by the Advisors, subject to the Assumptions and comments in our Reports were as follows:

Country	Fair Value 30 June 2021
Romania	€ 616,000
Poland	€ 1,333,495,000
Hungary	€ 305,400,000
Lithuania	€ 144,795,000

We note that the summary above shows Fair Value of 100% interest in the properties.
